Appendix 3 - Waters Identified for Delisting (Use Not Applicable) Since 2020 Report

Potomac and Shenandoah River Basins

Assessment Unit ID / Waterbody Name / Size / Use Removed / Parameter	Delisting/Use Removal Summary
-VAN-A30E_DEE01A00 -Deep Creek -0.019 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond # 001A-036, 20190615 HISTORICAL NOTES: 2012, 2014, 2016, 2018, 2020: A30E-06-SF NESTED 2012: 36253, 12/18/2008
-VAN-A30E_UMC05A02 -Upper Machodoc Creek -0.053 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond # 001A-036, 20190615 HISTORICAL NOTES: Federal TMDL ID 36028 (12/18/2008) 2004 VAN-A30E-03 / 2006 00822 / 2008, 2010, 2012, 2014, 2016, 2018, 2020: A30E-03-SF
-VAN-A30E_UMC05B20 -Upper Machodoc Creek -0.465 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond # 001A-036, 20190615 HISTORICAL NOTES: Federal TMDL ID 36028 (12/18/2008) 2004 VAN-A30E-03 / 2006 00822 / 2008, 2010, 2012, 2014, 2016, 2018, 2020: A30E-03-SF
-VAP-A32E_CAP01A04 -Cabin Point Creek -0.123 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Fecal Coliform - A32E-11-SF (CFL 2008) Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond #005-082B, 2/15/2019 Cabin Point Creek was initially listed in the 2008 cycle as impaired of the Shellfish Consumption Use due to VDH condemnation 004-082D, 1/27/2006. The impairment was addressed in the Lower Machodoc Creek Watershed Shellfish TMDL, which was approved by the EPA on 12/29/2008 and by the SWCB on 7/4/2009. In the 2022 cycle, the condemned area was considered administratively closed. The impairment will be delisted because the use is considered removed in administratively condemned areas.
-VAP-A32E_DAV01B22 -Davis Creek -0.016 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - 0.0161 mi2 Fecal Coliform - A32E-15-SF (CFL 2008) Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond #004-082G, 4/15/2020 Davis Creek was initially listed in the 2008 cycle as impaired of the Shellfish Consumption Use due to VDH condemnation 004-082D, 1/27/2006. During the 2012 cycle, the condemnation expanded and merged with the Nomini Creek impairment; therefore the segment was a portion of VDH Shellfish Condemnation 004-082D, 1/23/2012. The Nomini Creek condemnation shrank and split in the 2016 cycle; Davis Creek remains condemned. The impairment is considered nested within the Nomini Creek Shellfish TMDL, which was approved by the EPA on 8/22/2007 and by the SWCB on 7/31/2008. The condemnation expanded in the 2020 cycle. In the 2022 cycle, a portion of the condemned area was considered administratively closed. The impairment will be partially delisted because the use is considered removed in administratively condemned areas.
-VAP-A32E_JUL01A08 -Jules Creek -0.045 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Fecal Coliform - A32E-16-SF (CFL 2008) Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond #004-082G, 4/15/2020 Jules Creek was initially listed in the 2008 cycle as impaired of the Shellfish Consumption Use. The impairment was considered nested within the Nomini Creek Shellfish TMDL, which was approved by the EPA on 8/22/2007 and by the SWCB on 7/31/2008. In the 2022 cycle, the area was considered administratively closed (VDH-DSS condemnation 004-082C, 4/15/2020). The area will be delisted because the use is considered removed in administratively condemned areas.
-VAP-A33E_GAD01E22 -Gardner Creek -0.050 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - 0.0499 mi2 Fecal Coliform - A33E-01-SF (CFL 1998) Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond # 006-143A, 7/15/2020 Gardner Creek was included on the 1998 303(d) list due to VDH condemnation 143, 6/26/1996. The Shellfish Bacterial TMDL for Gardner Creek was developed during the 2010 cycle. The TMDL addressed the maximum extent of the condemnation, which occurred in condemnation 006-143A, 5/5/2005. The condemnation has expanded and contracted several times. During the 2014 cycle, the condemnation shrank again. The open area was partially delisted (0.0522 mi2) and is considered Category 2C. Condemnation shrank further in the 2018 cycle. In the 2022 cycle, two portions of condemnation A converted to administratively condemned. The shellfish use is considered removed in those areas and the AU will be partially delisted.
-VAP-A34E_SHR01A20 -Sharps Creek -0.032 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Fecal Coliform - A34E-19-SF (CFL 2020) Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond #010-105C, 7/15/2020 Sharps Creek was previously impaired of the Shellfish Use. It was considered nested in the Bridge Creek TMDL, which was approved by the EPA on 12/18/2003 and by the SWCB on 12/2/2004 as part of the Little Wicomico River Watershed TMDL Report. The condemnation converted to administratively condemned in the 2022 cycle. The use is considered removed and the impairment will be delisted.

Appendix 3 - Waters Identified for Delisting (Use Not Applicable) Since 2020 Report

Rappahannock River Basin

Assessment Unit ID / Waterbody Name / Size / Use Removed / Parameter	Delisting/Use Removal Summary
-VAP-E25E_FAM01B22 -Farnham Creek -0.074 Square Miles -Shellfishing -Fecal Coliform	<p>PARTIAL DELIST 2022 - 0.0741 mi2 Fecal Coliform - E25E-05-SF (CFL 1998) Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond #024-070A, 1/7/2019 VDH-DSS Condemnation 024-070A, 1/7/2019</p> <p>Farnham Creek has been assessed as not supporting the Shellfish Use since 1998. The TMDL was due in 2010.</p> <p>The bacteria TMDL for shellfish condemnations in Farnham Creek was approved by the EPA on 8/2/2006. The TMDL was based on the extent of the 1998 condemnation, which extended to the mouth of Farnham Creek (070, 10/22/1996).</p> <p>During the 2010 cycle, the condemnation size was reduced; the lower portion now open for harvest was partially delisted (Category 2C). The condemned area is considered a Category 4A water for the Shellfish Consumption Use.</p> <p>The condemnation expanded in the 2020 cycle and matches the extent of the completed TMDL.</p> <p>However, in the 2022 cycle, a portion of the condemnation converted to administratively condemned and will be partially delisted.</p>
-VAP-E26E_CEB01C22 -Eastern Branch Carter Creek -0.012 Square Miles -Shellfishing -Fecal Coliform	<p>PARTIAL DELIST 2022 - 0.0119 mi2 Fecal Coliform - E26E-46-SF (CFL 2002) Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond # 020-041A, 11/15/2020 VDH shellfish condemnation 020-041C, 11/15/2020 - admin</p> <p>A portion of Eastern Branch Carter Creek was assessed as impaired of the Shellfish Use during the 1998 303(d) cycle due to VDH condemnation 41C, 11/1/1996. Although the segment has expanded several times, the TMDL was completed only for the original segment. The TMDL due date for this downstream portion was 2014 since it first expanded during the 2002 cycle.</p> <p>It was considered nested in the upstream Eastern Branch Carter Creek Shellfish TMDL, which was approved by the EPA on 9/20/2007.</p> <p>The closure shrank and split in the 2020 cycle (portion of 020-041A, 1/8/2018 and 020-041C, 11/8/2018).</p> <p>In the 2022 cycle, condemnation A expanded, however condemnation C converted to administratively condemned on 11/15/2020 and will be partially delisted.</p>

Appendix 3 - Waters Identified for Delisting (Use Not Applicable) Since 2020 Report

Chesapeake Bay/Atlantic/Small Coastal Basins

Assessment Unit ID / Waterbody Name / Size / Use Removed / Parameter	Delisting/Use Removal Summary
-VAP-C01E_GOU01A06 -Gougher Creek -0.036 Square Miles -Deep-Channel Seasonal Refuge -Dissolved Oxygen	PARTIAL DELIST 2022 - Dissolved Oxygen Deep-Channel Seasonal Refuge Subuse Not Applicable The Chesapeake Bay standards were adopted in the 2006 cycle. In the 2022 cycle, the Deep Channel Subuse boundary changed and is no longer applicable in this segment.
-VAP-C01E_HEN01A00 -Henrys Creek -0.041 Square Miles -Deep-Water Aquatic Life -Dissolved Oxygen	PARTIAL DELIST 2022 - Dissolved Oxygen Deep-Water Aquatic Life Use Subuse Not Applicable The Chesapeake Bay standards were adopted in the 2006 cycle. In the 2022 cycle, the Deep Water Subuse boundary changed and is no longer applicable in this segment.
-VAP-C01E_HEN01B14 -Henrys Creek -0.030 Square Miles -Deep-Water Aquatic Life -Dissolved Oxygen	PARTIAL DELIST 2022 - Dissolved Oxygen Deep-Water Aquatic Life Use Subuse Not Applicable The Chesapeake Bay standards were adopted in the 2006 cycle. In the 2022 cycle, the Deep Water Subuse boundary changed and is no longer applicable in this segment.
-VAP-C01E_WCO02A08 -Warehouse Creek -0.008 Square Miles -Deep-Channel Seasonal Refuge -Dissolved Oxygen	PARTIAL DELIST 2022 - Dissolved Oxygen Deep-Channel Seasonal Refuge Subuse Not Applicable The Chesapeake Bay standards were adopted in the 2006 cycle. In the 2022 cycle, the Deep Channel Subuse boundary changed and is no longer applicable in this segment.
-VAP-C03E_MRE01A02 -Moore Creek -0.034 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Fecal Coliform - C03E-07-SF (CFL 2020) Shellfishing Use Not Applicable VDH-DSS Condemnation 034-208C, 12/15/2020 - administratively condemned The Moore Creek shellfish use impairment is nested within the nearby Healy Creek TMDL, which was addressed in the report "Piankatank River, Lower Watershed TMDL Report for Shellfish Condemnation Areas Listed Due to Bacteria Contamination". The TMDL was approved by the EPA on 11/15/2005 and by the SWCB on 9/7/2006. Size increased in the 2020 cycle (VDH-DSS Condemnation 034-208C, 12/28/2018). In the 2022 cycle, the condemnation split. The upstream portion is now administratively condemned (use removed) and the downstream portion is seasonally condemned. The impairment will be delisted in both segments.
-VAP-C04E_SLO01A08 -Sloop Creek -0.028 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Shellfishing Use Not Applicable - Admin. Condemned - DSS Cond #040-085A, 10/15/2020 Sloop Creek was previously impaired of the Shellfish Use due to condemnation 040-085B, 9/24/2018. The impairment was nested within the upstream Blackwater Creek Shellfish TMDL, which was addressed in the North River TMDL report. The TMDL was approved by the EPA on 6/7/2006 and by the SWCB on 3/23/2007. In the 2022 cycle, the area converted to administratively condemned. The Shellfish Use is considered removed and the area will be delisted.
-VAP-C04E_XFE01A16 -XFE - Piankatank River, UT (aka Kibble Pond) -0.016 Square Miles -Shellfishing -Fecal Coliform	PARTIAL DELIST 2022 - Fecal Coliform - C04E-21-SF (CFL 2016) Shellfishing Use Not Applicable - DSS Cond# 036-197B, 3/15/2019 VDH-DSS condemnation 0136-197B, 3/15/2019 - admin The area was previously impaired for the Shellfishing Use. The impairment was considered nested in the Edwards Creek Shellfish TMDL, which was developed in the Milford Haven and Gwynn Island Shellfish TMDL report. The report was approved by the EPA on 1/15/2008 and by the SWCB on 7/31/2008. In the 2022 cycle, the area converted to administratively condemned. The Shellfish Use is considered removed and the segment will be delisted.
