

## Module 7.

### Inspection Issues

1

## An Inspector's Job

### The inspector's job is two-fold:

1. Ensure the plan is implemented as approved
  - All controls installed (ESC and SWM)
  - Per the details and specifications

2

## An Inspector's Job

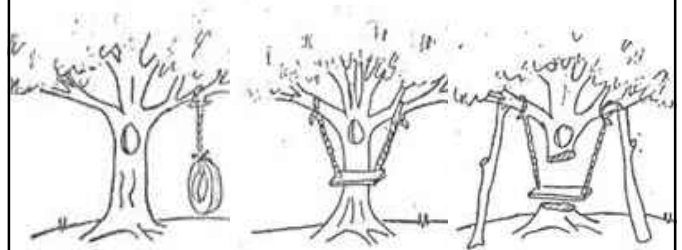

### The inspector's job is two-fold:

2. Identify when the plan needs to be changed
  - Constructability issues
  - Plan is inadequate

3

## Does it meet the intent?

Intent

Designed/  
Installed

"Fixed"

4

### If the installation is flawed:

#### § 62.1-44.15:55.B.

The VESCP authority shall determine that the person responsible for carrying out the plan certifies that he will properly perform the erosion and sediment control measures included in the plan

5

### If the plan is flawed:

#### § 62.1-44.15:55.C.

The VESCP authority may require changes to an approved plan in the following cases:

1. Where inspection has revealed that the plan is inadequate to satisfy applicable regulations

6

### Inspectors in Action

Look at the following photos and determine

1. What was the intent of the practice?
2. What's the problem?
3. Was a "fix" attempted?
4. What is a permanent fix?

*Note: all these sites had inspectors...*
